

Comparing Dashboard 1.0 to Dashboard 2.0

Safe harbor statement:

All product features and delivery dates mentioned represent current product development expectations only and not a delivery commitment. These features may not be delivered in the indicated time frame or at all. Customers should base their purchasing, administrative, and configuration decisions solely on functionality that is currently available.

About SuccessFactors Dashboards

This document serves as a high-level comparison of features in dashboard 1.0 and dashboard 2.0. Please be aware that for some features there can be minor differences in how the individual features work in the two different dashboard frameworks.

There is a long term plan to sunset dashboards 1.0. Therefore no further development will be invested in dashboards 1.0. All engineering focus will be on making dashboard 2.0 a better and more flexible replacement for the old framework.

Feature comparison

Modules covered	Dashboard 1.0	Dashboard 2.0
Performance Management	✓	✓
Goal Management	✓	✓
Compensation Management	✓	✓ ¹
360 Review	-	✓
Succession Management	-	✓
Recruiting Management	-	✓ ¹
